Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2004.

DETAILED ACTION

Election/Restrictions

Applicant is reminded of the election of species 4a-4e on 07/07/03.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/25/04 has been entered.

An action on the merits now follows.

Response to Amendment

Drawings filed 10/25/04 have been approved.

The previous prior art rejections have been obviated in view of the amendment filed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,5-6,8-10, 16-17,19 rejected under 35 U.S.C. 102(b) as being anticipated by Jackson (USPN 5,174,284).

Jackson discloses an apparatus comprising a bite block which is for positioning within the oral cavity having a tubular member(which is the passage within the apparatus or the medical tube 57). The tubular has a lumen thus, it is adapted to receive an external instrument. The gripping jaws are shown clearly in figures 1,5,8,9. Since Jackson discloses the jaws are movable, the claim language is anticipated in as far as the material is resilient , thus when the teeth are clamped down at the most proximal end of the device, the jaws will be capable of selectively moving between an open spaced apart position and a closed-adjacently spaced position.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3,13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson (USPN 5,174,284).

Jackson discloses the claimed invention except for the material of the jaws being a resilient memory plastic. Jackson is silent to the materials of the jaws. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the material of the jaws to suit the area to which it would be applied to , since it

has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended uses as a matter of obvious engineering choice lacking any criticality. In re Leshin , 125 USPQ 416.
